

THE EMPRESS EXPRESS

VOLUME XV, No. 13

EMPRESS, ALTA. THURSDAY, Aug. 25, 1927

Price: \$2.00 Per Year

United Church

Church School, 10:30 a.m.
The place of the child is supreme in today's conception of humanity and the problems of the future.

Public Worship, 7:30 p.m.
To be conducted by Rev. J. M. Johnston, student minister at Mayfield.

You will enjoy his message.
A special feature of the Sunday evening service will be a vocal solo.

Rev. N. W. Whitmore, Minister.

Viewfield and Forks

There will be no services at Viewfield and Forks until Sunday, September 11, owing to Minister's absence on holidays.
N. W. Whitmore, Minister.

Mayfield

United Church Services, August 28:
11 a.m., Divine Service.
12 a.m., Sunday School and Bible Class.
3 p.m., Wainfield School.
Mr. Doxey, former student, will conduct services at Mayfield. Come and hear him.
J. M. Johnston, Student Minister.

CARD OF THANKS

We wish to extend our thanks to all who so kindly assisted us during our late bereavement.
Mr. and Mrs. H. Gravett, Buffalo, Alta.

Bachelors Club Stage Enjoyable Dance

A very pleasant and sociable dance was staged in the Theatre by the Bachelors' Club on Wednesday evening. The dance was in honor of Mr. and Mrs. Ernest Hutchison. Tom Wallace, on behalf of the Club, made a presentation to the bride of a very useful household article: a Rolling Pin.

Funeral

The funeral took place on Friday, August 19, of Lorna May, six-months old daughter of Mr. and Mrs. Herschell Gravett, of Buffalo. Burialment took place in the Empress cemetery. The funeral was well attended by relatives and friends of the parents.

Extra Precautions Against Fire Are Needed This Year

Owing to the length of grass and luxuriant growth on the prairie this year, the danger of fire is very great and should not be underestimated. Smokers should see that any cigar or cigarette ends are extinguished when discarded and they should not be left alight in any nooks or crannies of buildings. A little lack of thought in this regard may endanger the lives of many people. Fire equipments in towns, fire guards around the homes and villages, are necessary precautions which should be given attention. Chimneys and stove pipes will be the necessary attention before the harvest of wheat you too far into the Fall season when fire will be needed in the home.

When your friends visit you, honor their visit by sending in the particulars to the "Express" for publication. Be very careful that initials and name are right.

Application For Lease Of Road Allowance Or Surveyed Highway

Notice is hereby given that W. A. King, of Buffalo, Alta., has made application to the Minister of Public Works, Edmonton, for a lease of the following road allowance or surveyed highway, viz: between—
N.W. 22-23, W. 4 and N.E. 22-23 W. 4.
Any protest against the granting of the lease must be made and forwarded to the Minister of Public Works, Edmonton, within thirty days from the date of this notice.
Dated at Buffalo, Alta.,
W. A. KING, (Applicant)
Thursday, 18th August, 1927.

Hospital Notes

The infant daughter of Mr. and Mrs. Schman, of Burstall was here for medical treatment and minor operation last week.

The young son of Mr. and Mrs. John Zieb, of Burstall, was run over the head by a wagon, fracturing the base of his skull. He is now doing well.

Mrs. Deering, of Cavendish, who underwent a minor operation last Thursday, is progressing favorably.

Mrs. Henry Kerr, of Preble, returned home Wednesday, following a week's medical treatment in the hospital.

C.P.R. Crop Report

Winnipeg, Man., Aug. 22.—High average yields are promised in Alberta. Rains have enhanced prospects particularly of later grains. Need now is for warm sunny weather to ripen crops. Operations all over the province will be fairly under way by August 29. Rains are responsible for some fallen crops. Harvesting of Winter Rye and Wheat cut. Haying is practically over and is an excellent crop. One thousand acres on the south end of the Blood Indian Reserve was completely hailed out on the night of the 19th.

Outdoor Good Manners

It is too bad that the visitor to the forest does not more often carry with him the good manners and consideration for others that he practices at home. He should know that it is unpardonable to throw down the lighted match or cigarette in the forest, just as well as he knows he must not throw the cans and old clothing into the street at home. He should learn how to behave in the forest just as he learns it for the drawing room. The smoker would not throw his match or cigarette stump or empty his pipe on his host's rug or table cover, but without giving it a thought, the same smoker tosses a burning match or ash-ore on the floor of his host, the forest, where it threatens property worth millions and even human lives.—Brooke Hustler.

The customs officer looked suspiciously at the bottle. "It's only disinfectant," stammered the returning traveller. "Oh, is it?" snorted the officer, and drank a mouthful. It was.

Mr. and Mrs. Stoneley and family have returned from their vacation spent at Niagara Falls. They report the colour illumination at night on the Falls a gorgeous spectacle.

Splendid Heads of Wheat

Some very fine heads of wheat were brought into town on Tuesday by H. Wheaton which were said to have been taken from a field of his grain and a wheat field belonging to D. Swannenberg. One of the heads was $\frac{5}{8}$ inches in length and eight-rowed. The other heads were very similar. The length and breadth of these heads of grain were very striking in appearance and some big yields of grain will undoubtedly be common in the country north of town.

Hutchison-Clark

A quiet wedding took place at the Menzies Hotel on Monday, August 15th, when Mr. Ernest Hutchison, of Empress, Alta., was united in marriage to Miss Opal Clark, of Calgary. The Rev. H. Edwards, officiating. Mr. and Mrs. Hutchison, left later by car for Empress, where they will reside in the future.—Alesk News.

Away From The Fields

No matter how pressing the work, the farmer and his wife who allow any summer to slip by without indulging in at least a few days' vacation and complete change of scene are guilty of the poorest kind of economics, says the "Farm and Home," a coast agricultural publication. The first factor in agricultural success today is not altogether good soil and good climatic conditions, but the brains and view point of the farmer. Farming today is not a mere routine of specified labors. It is a pitting of an alert intellect against climatic marketing and seasonal conditions. The farmer who allows his brain to grow weary through overwork, is jeopardizing the most valuable part of his farming equipment.

An officer in one of our big steamship lines, lately returned from a Mediterranean cruise, has brought with him this delightful story, which he had at first hand from a guide at Athens.

A party was being shown the Acropolis, when one of the visitors, an American girl, after an enthusiastic, "Gee, I'll say it's great!" appeared to miss something. "Say," she said, "where are the four horsemen, anyway?"

"Genius is mainly an affair of genius,"—Matthew Arnold.

Prepare Now For Next Season's Seed Requirements

A grain grower can do much to improve the quality of his seed grain. It has been shown conclusively that good seed grain will often give 25 per cent more crop per acre than "scrub" seed.

Now is the time to take steps to secure good seed for next year. If you have a good variety do not change your seed, change of seed is advisable only when your own seed is badly mixed or is of an inferior variety. You will have a field of wheat, oats or barley that is better in some spots than in others, let these good parts of your field be the source of future seed. The best part of the field that is best should be stalked off or laid out so that the crop may be harvested separately; this separate harvesting is very important. Before harvesting it is a good plan to cut a strip of seed and plant it about all the field on the inside of this road (or cleared strip) may be saved separately.

Having selected the plot for next year's seed wheat, for instance, it is advisable to pull out any heads that are off type, and any other cultivated plants such as oats and barley, pull all heads that are weak, diseased or otherwise undesirable, and any noxious weeds. It is advisable to go over this plot at least three times, or more if possible. Keep it until your plot is clean and pure.

Harvesting.—Reference has been made to a road around your plot; this road should be clear of all stalks. Before cutting the plot see that your header is thoroughly clean. When the seed plot is cut, stook it separately so that the crop can be threshed separately.

After harvest handling.—As great care has been taken to make your field as near perfect as possible, do not ruin this work by careless threshing. See that the threshing machine is absolutely clean. This can be done, if you own your own machine, if you can clean up during the summer and then thresh your seed plot in the fall. However, you have to rely on custom threshing then you will find it more difficult. A good substitute for cleaning is to thresh some other class of grain before you thresh your seed plot. For instance, if you wish to thresh a plot of wheat or barley, thresh oats first and then allow the machine to run until there is nothing left in the machine, or until nothing comes out of the grain spouts, then we may consider the machine to be as clean as we can get it under the circumstances. Always thresh this seed plot in clean bags, and if the grain is not only partially filled the bags and do not pile too many together. Turn these bags over daily until the grain is dry, and

Anglican Church

Services on September 4th (17th Sunday after Trinity):
St. Mary's Church, 11 a.m. Morning Prayer.
Ansle School, 3 p.m. Evening Prayer.
Estuary School, 7 p.m. Evening Prayer.
The above services will be in charge of the Rev. O. Norton, Vicar of Cabri.
L. J. Tatham, Priest-in-charge.

A few very good gardens have been raised in town this summer. The flowers in the garden of Miss A. G. Rowles, were and are still a mass of bloom.

store in some place where there is no chance of contamination and away from mice or rats.

Early in the winter this seed should be cleaned thoroughly, and as in the case of the threshing machine see that the grain cleaner or fanning mill is scrupulously clean, a dirty fanning mill has ruined many a good sample. Always see that the bags are clean, the use of dirty bags is another source of contaminated seed.

It is realised that, if the acreage to be sown is large, you cannot produce enough seed for your whole acreage in this way, but you can at least produce enough good seed each year for part of your acreage; and this acreage in turn will produce better seed for the whole of your farm in succeeding years.
P. R. COWAN, Cerealist, Central Experimental Farm, Ottawa, Ont.

Comprehensive Plans For Conserving Wild Life In Canada's Vast Northern Areas

Much is being done by the Department of the Interior to organize and explore the vast territories lying to the north of the Prairie Provinces. It is fully realized that development of the natural resources will depend on a robust native population and an abundance of wild life. In conformity with this realization game preservation has been set aside for the comfort of the natives; expert investigators have been detailed to examine and report on wild life conditions; expeditions have been conducted with a view to the introducing of new species of animal life; and regulations have been enforced with regard to the destruction of predatory animals. One of the most important experiments has been conducted in the transferring, to the Wood Buffalo Park at Fort Smith, of a large number of buffalo which were supplied by the Walworth Park, Alberta. The experiment has been watched carefully for three years, and it is now known to have proved a great success.

To the end of 1925 nearly 4,600 buffalo were transferred from the Walworth National Park, Walworth, Alberta, bringing the herd at Wood Buffalo Park up to over 6,000 animals. The movement for the present year started on June 3, when 159 yearlings, 72 two-year-olds, and 20 three-year-olds arrived at Walworth. At this time, the number of animals in the park is 11,000. The government of 2,000 animals is complete. Park wardens, rangers, and guides are stationed at the Wood Buffalo Park and are very well conditioned and this is verified by other officers who have seen herds when travelling through the district.

As the progress continues, the results in the future will be becoming better known but to date, although the Wood Buffalo Park covers an area of 17,200 square miles and rich meadows and protected woods wherein the buffalo can thrive are known to exist, the extent of these and the number of animals which can be economically supported have not been ascertained. The area has never been mapped nor has a single mile of survey been run for this purpose. During the last session of Parliament money was voted for the purpose of undertaking a survey of the park and surrounding district.

Another investigation which is being carried on in the Northwest Territories, with a view to the future development of the Mackenzie District, has reference to the suitability of the area for the support of caribou. For the purpose of studying this problem the Department of the Interior in 1925 engaged the services of the brothers A. E. and J. W. Perill, men of wide experience in the Arctic regions and with a broad knowledge of wild life. They were directed to investigate thoroughly all the conditions relative to the possibilities of introducing reindeer into the Mackenzie basin, should the conditions be favorable the public investment which will be involved, even in establishing a minimum of 10,000 animals, will amount to a considerable sum of money.

The Perill brothers spent eight months of last year investigating the underlying causes which have brought about the successful establishment of reindeer in Alaska. They were directed to the Yukon river towards its mouth and trekked by dog team to Kotzebue and on to Point Barrow, covering all the country to the south east of the latter place, and finally reaching Alaktik in March, 1927. During the present year they are working out from the delta of the Mackenzie and will cover the Great Bear Lake district with a view to ascertaining how the conditions in the Mackenzie District compare with those in Alaska.

Took No Chances

King Pood, who recently was released at Buckingham Palace, was determined to make none of the errors in royal or social etiquette which are, however, forgivable in a foreigner. When the visit was definitely arranged, he acquired the services of a certain courtier who, for a princely fee, initiated him in all the intricacies of British Court ways.

Guinness Money Problem

Travelers in China have found the numbers of coins and the rates of exchange on almost unbelievable. There are more than 200 different kinds of money, worth different amounts in different parts of the country, and there were 17 mints in the country working 24 hours a day.

W. N. H. 1925

War Upon Speeders

Protection Needed For The Deaf

Motorist On The Public Highway
Hon. J. L. Perron, Minister of Highways in the province of Quebec, is continuing his war upon reckless motorists, and for such he is to be highly commended. Every man who drives a car recklessly or in any fashion which invites an "accident" compels innocent drivers in other cars—to say nothing of pedestrians—to risk sudden death or dire mutilation. If this is not "potential murder" what is it?

The dangerous driver—whether he be drunk or only intoxicated to the safety of others—is, as the Montreal Star points out, in precisely the position of a man who holds a rifle at random down a busy street. He might hit no one. But he is none the less a "potential murderer" for it is not his fault if the people who are passing are lucky enough to escape.

We would jall the man with the smoking rifle. But we have not yet reached a development of public opinion which always leads us to jall the man with the smoking rifle. He must actually hit somebody before he is taken seriously in law—and even then it is often not half serious enough. Stripping these law-breakers of their license is a step in the right direction, but only a step. There is more, indeed, than a simple one. There must be protection for the law-abiding citizen for feeling that the public highways—Regina Leader.

Winnipeg Newspaper Union

The Winnipeg Newspaper Union, which has been in existence for some time, is now in a position to take action against the Winnipeg Free Press, which has been refusing to recognize the union. The union has filed a writ of mandamus in the court to compel the Free Press to recognize the union.

Health In Words

Vocabulary Of Fifty Thousand Needed

Says George H. May, president of the Southern Illinois State Normal University. Speaking at the general assembly of the National Education Association here, he said:

"The newest dictionaries list more than 45,000 words. The man who knows the meaning of the words in the dictionary and does not recognize one word in nine, or a total of 50,000, is not a scholar. Each of us has a 'house vocabulary' of about 15,000 words. All the rest of the fifty thousand or more we must acquire from various direct sources."

"All studies will, of course, enrich vocabulary, but literature makes the largest single contribution, and it is a 'valued vocabulary' that literature contributes; furthermore, familiarity with literature gives personal power to some degree of others. The teacher of literature co-operates best with the teacher of rhetoric and composition when he develops in the student the capacity for feeling that literature is the 'introduction of the first phrase.'"

Over Million Hares In Saskatchewan

Census Figures Show 991,864 Were Over Age Of Two Years

The total horse population of Saskatchewan for the year 1925 was 3, 991,864, according to figures in the census of farm animals for the province compiled by the department of Trade and Commerce, Dominion Bureau of Statistics. Of this number 391,864 were over the age of two years. There were 3,525 mares recorded.

The number of cattle for the same period was slightly higher, the total being 1,155,262, made up of 296,328 calves, 631,257 cows, 125,779 steers and 21,458 bulls.

Sheep in the province in 1925 totalled 1,617,720, making possible a total flock of over 1,600,000. There were 1,418 ewes over the age of one year, 2,316 rams one year and older, and 2,566 wethers one year and older.

The number of swine for last year, it is given at 297,455, of which number 14,129 were under one month of age, 38,929 were for breeding six months of age and older, 4,863 were boars for breeding six months of age and over, and 2,124 other hogs six months of age and over.

Honey Industry Is Becoming Important

West Will Soon Overtake East In Matter of Production

Beeskeeping on a branch of farming is rapidly increasing in Canada. In 1921 total production of honey for the Dominion was 7,000,000 pounds, while last year it amounted to 21, 000,000, a three-fold increase in five years. The financial returns to beeskeepers in 1925 was \$10,000,000. Ontario and Quebec are the chief centers of the industry, with Manitoba in third place. Saskatchewan, Alberta and British Columbia farmers are establishing apiaries in increasing numbers every year, and will be well posted in all details of the business in the near future. The eastern provinces in the matter of production. The Saskatchewan department of agriculture has appointed a specialist in agriculture to advise the beeskeepers of that province regarding the intricacies of the business and the importance of this as a feature of farm enterprise.

Big Caribou Herd

Herds of Caribou, thought to number some 60,000 are reported to have been seen between Isaac Creek and Selkirk on the Yukon river. They were filmed by a news photographer from the steamer, White Horse.

C.N.R. HONORS LINDBERGH

On the occasion of his visit to Ottawa to attend Canada's Diamond Jubilee Celebration, Col. Charles A. Lindbergh, world famous transatlantic flyer, was presented with a perpetual pass over all lines of the Canadian National Railways in Canada. The pass, which was specially made for him, was presented by Mr. J. D. Patterson, president of the Canadian National Railways.

Extra Care Needed

With Country Radio

Special Grounding Contrivance Necessary To Eliminate Danger From Lightning

The radio owner living in the country has a distinct advantage over his city cousin, as there is no interference from neighboring sets, high tension wires and similar apparatus, which means that the reception of this popular invention in the towns and cities. But the man in the village and on the farm is also at a disadvantage, because if a special cord is not taken in the installation of the radio, the set may actually prove a source of danger to the owner. With modern radio fighting equipment, all its command and with tall buildings and inflammable pipes and wires to carry away lightning charges, the man in town has little to fear from his radio.

The man who held up the aerial on the roof, warns Deputy Provincial Trade Marshal George F. Lewis, should never be higher than the terminals of the lightning rod system, and if the building is not rodged, it is a bad practice to have the aerial in the house. That was one of the chief points in a short series of talks made at a house visit string from the house. But this precaution alone is not enough, a lightning rod must strike the aerial, travelling down the radio set in the house, and then to the ground.

To prevent such an accident, country radio users are advised to install a double throw, single pole, knife switch between the aerial and the set. This switch must be of ample size, at least four inches long and the point of the switch is connected to the aerial and at one end to the radio set and the other to a wire leading outside and down to a good ground connection. When the set is not in use, the switch should connect the aerial with the ground so the set will be grounded. The switch should be carried on the receiving apparatus. A tag should also be attached to the set, showing people not to use the set during an electrical storm.

"No radio set should be installed without an approved lightning rod system," concludes the Deputy Trade Marshal, "but this piece of equipment should not be confused with lightning rods, which are a simple device for protecting the radio receiving apparatus only."

Demand For Trees

Grows Of Trees Mean Contented Homes In The West

H. W. Leonard, secretary for the Dominion Forestry Branch at Indian Head, says: "The demand for trees has been insistent from all over the west. This year we have ordered for 3,000,000, as against 6,000,000 in 1925. Following this year of the west, he said, "I find generally a more keen feeling for the future. People are planning for the future. The old days, when farming was a hard job and some people were not sure of the future, are gone. Farmers are planting trees, and wherever a grain of forest is found, there you will find contented homes."

Canadian Wood For Ships

Boards for British Columbia will be used in all details of the ships to be built for the Canadian National Railways West Indies service, and Canadian woods of various kinds will be used for interior fittings. This was announced at Victoria, B.C. following representations by Hon. T. D. Pattison, minister of lands.

No peer comes to the House of Lords with his gloves on when the King is present. He appears unadorned before the sovereign, and in order that he may be made certain that he carries no hidden weapon, his hands are bare.

White Wild Ducks

How Type of Feathered Bird Has Come Into Existence

What is a new strain in Canada or in any way of the world? A lot of white wild ducks were seen at Brandon, provincial exhibition grounds last year. They were taken at the lake. Expert ornithologists have failed to give a satisfactory explanation for their existence, but they are showing a new type of feathered bird has come into existence, and that during the last few years.

The story is that about three years ago, R. M. Matheson, K.C., read in a Canadian magazine that J. Lake, Minister of Ontario, had told that a white wild duck in a corner of Lake Ontario and managed to secure them. Mr. Matheson at once wrote to the Minister and had the article verified, was also given the promise that when the time came, a pair of the offspring of the strange birds would be sent on to Brandon. This was done in due course, and the result is the broad white, wild ducks shown at Brandon.

Only one complete team of horses came lately through the town. In 1811 they were over a mile and a half long. Their last task was to draw the gun-carriage of the Union Pacific in Paris. They are now sent to the coast.

Lord Grey On Relations Between Britain And Moscow In The Past And The Future

Circle Egg Marketing

An Excellent Example Of The Value Of Co-Operation

The famous district surrounding Campbellford, Northumberland County, Ontario, provides an excellent example of the value of co-operation. The marketing of eggs on a circle basis began many years ago and had the good effect of inducing the farmers to work together in the marketing of one common product. For a few years growth of membership ceased and interest fell away, and it was largely through the influence of the good work of Mr. F. H. Baker, District Product of the General Government, that a reorganization was brought about and a new manager, with good business ability and possessing fine salesmanship was appointed. That was one year ago when the membership was but 16 in all. The success of this system of marketing soon attracted the attention of members, who, on receiving the benefits of selling on a circle, began to enlarge their flocks and take better care of their birds and deliver their eggs with increasing promptness and care. Farmers now market through the circle an average of nearly \$25,000 in eggs. The growth of this circle has gone on in a quiet but an increasing and steady way. The system of handling eggs has been improved from time to time. Recently a new style of egg cartons had been introduced for use in automobiles. These are designed to avoid breakage during transit and have also been improved by adding the cushions and mats of minor cars. The circle is owned and operated by the producers themselves, who are proud of their system and always ready to have its methods made known to interested neighbors who are in pressing in the poultry industry.

Fattening Rabbits

Rabbits, like poultry, should not be marketed as meat, but as a delicacy.

Rabbits, like poultry, should not be marketed as meat, but as a delicacy. Rabbits are fattened, a process that takes from 20 to 25 days. Fattening should be begun at the age of a month and for this purpose the rabbits should be placed in small, narrow hutches, in a quiet place, not too much exposed to the sun. The ration of agricultural bulletin on rabbits the following ration are recommended. During the first few days of fattening the rabbits should be fed on green alfalfa. If available, good salt hay and roots. The green feed should be gradually discontinued and replaced by such feeds as milled barley, malted barley, mixed with bran, barley meal, or even meal, or stale bread soaked in milk with an occasional carrot or stick of celery. Feeding should be done three times a day, the noon feed being the lightest and the evening one the heaviest. The noon meal should consist of those elements that excite and whet the appetite. A few feeds of oats should be given the few days before killing. The root feeds must be served clean without dirt or root hairs adhering, and they should be fed whole, never chopped.

White Wild Ducks

How Type of Feathered Bird Has Come Into Existence

What is a new strain in Canada or in any way of the world? A lot of white wild ducks were seen at Brandon, provincial exhibition grounds last year. They were taken at the lake. Expert ornithologists have failed to give a satisfactory explanation for their existence, but they are showing a new type of feathered bird has come into existence, and that during the last few years.

First Crop Is Best

Seven years of tests by the College of Agriculture, University of Illinois, show that the production of red clover seed is highest when the crop is cut once in the year and the seed is used for seed. It has been the custom of farmers to use the first or spring crop for hay, and the second crop for seed.

"I liked London and Paris very much. They must be wonderful."

"But the best part of the whole thing was the trip over. Don't miss it if you ever go abroad."

Lord Grey On Relations

Between Britain And Moscow

In The Past And The Future

The relations that have existed, and that should exist in the future, between the government in Moscow were analyzed by Lord Grey, who delivered by Lord Grey of Faldoon, the wartime British foreign secretary. Lord Grey recalled what he said, many forgot. He said it was not the Bolsheviks who upset the Tsar's government. It was Kerensky who aimed at establishing a Liberal regime, which has, though, been superseded by another despotism imposed by the Bolsheviks, with greater efficiency, than that used by the Tsar's government.

The Soviet policy is not national, in that it does not promote Russian national interests. It purports to cause world revolutions, on the past, but it has not carried out its plan. The phrase has not been discussed, "a world-revolution of which Moscow is the head." However, it is the difference between the Soviet government and every other government in the world.

CHAPTER V.—Continued

The girls agreed that so it came about that Helmi, that girl, was her first invitation to a party. She was in the basement, cleaning out Miss Abbie's fruit caddy, when the invitation came. Two girls both dressed in the pleated skirt and middie shoe so much admired, stood at the back door asking to see her. Lady Powers was the speaker, and the invitation was properly given. The only difficulty was in the fact that Helmi did not understand. Miss Abbie received the invitation and undertook to see that Helmi was present.

The basement of Young Methodist Church is the ordinary church basement, reached by a stairway that is worn off and gray by the passing of many feet, but to Helmi that Sep-tember evening when two girls came and her father took her to conduct her father it was a palace of enchantment.

They proceeded at once to the tower room, where small parties were held, and here, due to the decorating committee, opened a scene of loveliness that made Helmi catch her breath. Autumn leaves marked the electric fixtures over the table to each corner of the room. These were the Autumn decorations made by the girls at one of their meetings, and would have been replaced by the fallowen yellow and black cloths, white and pumpkins. A stone creek filled with reindeer and purple asters stood in the middle of the table, and from it, three went out to each plate roses of raffles from Lady Powers' father's greenhouse. A broad band of autumn leaf escape paper ran down the middle of the table, and a Helmi's plate was a hand-painted card with the leaves and Maple Leaf. On it was printed "Welcome to the Autumn of the year." The streamers of autumn leaves above the table made it easy for Helmi with her quick imagination to believe the table was in some small glade under the golden and

RESTORED TO GOOD HEALTH

Mother of Eleven Children
Praises Lydia E. Pinkham's Vegetable Compound
Her Interesting Experience

Buckingham, Quebec.—"My baby the mother of eleven children and I am five months older. I am twenty-eight years old and I have had Lydia E. Pinkham's Vegetable Compound for weakness and my health. I know it from my sister, Dana E. Buckingham, Quebec. I was in misery and was always ready to die. Now I am a happy, healthy, good health. My daughter, who is 15 years old, has also taken it and is very happy. I recommend it to all young girls."—Dana E. Pinkham, Quebec. My nervousness and other ailments common to women from early life to old age, when Lydia E. Pinkham's Vegetable Compound will give you relief.

In a recent country-wide canvass of purchasers of Lydia E. Pinkham's Vegetable Compound, the following replies were received, and 98 out of 100 recommended it for its relief by its use.

could pork and beef, and pickles, and fresh apples that Lady Powers had made herself at school. Lady Powers had to get this over to Helmi through the medium of her mother's pink, supplemented by signs. And for desert there was ice cream, black pink and white, with nuts and cake and cream.

And the dishes were beautiful, with green ropes and pink roses, and somehow it seemed to bring God nearer than anything else. Helmi liked pink roses in His dishes. They must have a nice God in Canada!

When the supper was over the girls all stood up and sang with hands clasped. Helmi stood between Lady and Helmi. The music was strange, the words unintelligible, but the hand-clasp was warm and friendly. Helmi understood it and thrilled with a great new passion. In God's house she had been a guest and had found friends.

The leader presented her with a little Testament and a Blue and Gold Book which had her name in it, right on the front page. Lady showed her some words and asked them to sing over and over again, and somehow Helmi did not know what they meant, she learned to say them, and because the words were vibrant with youth and hope and eager aspirations they fired her young heart with a great desire to live properly and seriously. She belonged now, she had her own gang. She wanted to do something for God to show her love for Him, for her new country and these new friends.

Very early the next morning, when the crystal dawn, cool and sweet, was stealing into the sleeping porch on Chestnut Street, came a knock. A young girl with a scrubbing pal and a red headscarf, who had been in the night finding it looked, she went round to one of the windows in the tower room, the one which had been just above her head. It yielded to her careful touch, and in a moment she and her pal had gone in.

The next morning, when the janitor came grumbling to his task a strange scene met his eyes. From the tower room above the dingy house of a workman, doors, polished, windows, shining woodwork—hardly a lone small, clean soap, satisfactory.

"Maybe I was wrong about those youngsters; they're good some religion after all," he said.

As Helmi went around her work the next day she sang the tune of the song, but she could not quite get the words. Miss Abbie, who was dressed in a white dress, came over and told her what it was: Helmi was singing Lady taught the words to Miss Abbie, who, when the ladies were visiting, he taught the next week was waiting to have them sing Helmi sang, but she had been on night at the Club, said Miss Abbie proudly.

"Miss Abbie knew very well the minister's sister would think that the girls should have taught her 'Abide With Me' or 'Swing in the Morning,' but she said she was busy, but she was prepared to tell Miss Terry that times were changing." (To Be Continued.)

Motoring Unsafe In Persia

Roads Are Different and Traffic Worst in World

There are still a few adventurous occupations left in the world for those who care to seek them. Carrying the Persian mail is one for Persia has few railways and only one or two open ports. Teheran, the capital, is 500 miles from the frontier, and once a week the consular mail leaves Teheran for Khamabul on the Iranian border, and is there transferred to motor transport in three days with luck. It will reach Teheran.

Normally the Persian roads are "safe." That is, they are normally free from brigands, for Isaza Shah has taken the most drastic measures in connection with the surveillance and improvement of communications. But safety has a restricted meaning, for the roads are full of dangers to life and property. A Persian road is different from all others.

Here and there it is bare earth level by the passage of countless caravans on the Golden Road; here it is roughly fortified by mud walls and by the presence of soldiers; and there it is a mountain track, steeply ascending, leading to a small village or a fort. Long strings of camels are loaded with goods, and there, still more loaded with goods, are the camels of the caravan. The whole road is covered by two rows of camels, each drawn by two drivers by hand or by a single driver by a pair of bullocks to assist in pulling.

People sometimes rush in and win while wise men are investigating.

"Swat the fly" with GILLET'S LYE

A teaspoonful of Gillett's Lye sprinkled in the Garbage Can prevents flies breeding

Use Gillett's Lye for all Cleaning and Disinfecting

Costs little but always effective

Canada's Student Body

Eighty-three Colleges in Operation

In Dominion Last Year Canada had eighty-three colleges in operation last year. Of this total, there were 42 affiliated institutions, including 21 classical colleges, 11 seminaries and independent non-subsidized classical schools in Quebec, 26 theological, 4 agricultural, 2 law, 1 military, 1 technical, 1 commercial, 1 pharmacy and 1 veterinary.

The total registration of these colleges was approximately 77,122. In addition to 2,629 included with secondary technical institutions. This registration, according to the Dominion Bureau of Statistics, composed about 1,600 doing work of university standard, 6,500 work preparatory to matriculation, and the remainder taking vacation courses, extension courses, evening courses and the like.

Of the students of university grade in the Dominion, 14,000 were in the field, with a total of 2,023. Theology, philosophy, medical and missionary courses, commerce, law, engineering, science 66 and engineering 23. Practically all the students of university grade were full time students.

Will Be Great Advantage

Steam Cooled Auto Engines Possible In Few Years

We'll have steam-cooled engines in our automobiles within a few years, say the predictions of Prof. Edward P. Colver, of the Princeton School of Engineering.

There will be no change in the engine, except the transfer of the boiler, that enters the present radiator at the top, to the bottom, and the conversion of the radiator into a cooler into a steam condenser.

The greatest advantage of steam cooling, says Prof. Colver, is its economy. It takes less engine at a constant and most efficient running temperature, no matter what the temperature is outside.

Good Business

Some people make chicken feed but pay no attention to it being a venture, but scarcely any one of whom we have heard ever did so well with it as the boy, Indiana by name. Someone asked his father whether chickens really paid. "They pay my rent," said the old man. "I bought him the chickens; I empty the feed; I buy the eggs from him, and he eats them."

We cannot hear a sound if it has less than about thirty or more than about a million a second.

ECZEMA LASTED TEN YEARS

On Knees, Would Itch and Burn, Cuticura Heals.

"From the time I was a small child I was troubled with eczema on my knees. It broke out in a rash and would itch and burn so that I would scratch and cause eruptions. My stockings aggravated the itching, and I lost my rest at night because of the irritation. Later it broke out on my arms. The trouble lasted about ten years."

"A friend recommended Cuticura Soap and Ointment to me. I bought a box of Cuticura Soap and two boxes of Cuticura Ointment and used them for a week. I was completely healed." (Signed) Miss Kathleen O'Connell, Port Dalrymple, N.S.

Relay on Cuticura Soap and Ointment to keep you free from itching and burning. Write for free booklet. Send ten cents to Wm. L. Rogers, Inc., 100 N. 3rd St., St. Paul, Minn.

History Of Aviation

The Evolution Of Flying From Its First Inception

The first to fly: In a dirigible balloon was Henry Cliford in 1852. It had a three-horse power steam engine.

In an aeroplane driven by an engine was Orville Wright, on Dec. 17, 1903. He used a 16-horse-power engine.

Seven miles in an aeroplane in France was Delagrangue on June 22, 1908, at Milan.

An hour in an aeroplane was Orville Wright, on Sept. 9, 1908, over 1,000 feet high was Orville Wright, on Oct. 2, 1909, at Berlin.

Across the English Channel was Berliet in a monoplane on July 26, 1909.

Across America from the Pacific to the Atlantic, over 4,200 miles, was Rodgers, 1911.

Across the Atlantic in a seaplane was Commander Reed, R.N.S., in 1913.

—direct from Newfoundland to the British Isles in an aeroplane was Einar Egede, on July 1, 1916.

—an airship across the Atlantic were General Mallard and Comman-

—direct from the United States to Europe in a monoplane was Colonel Lindbergh in 1927.

Enthusiastic Over Farming In The West

Representative of Norwegian Government Favorably Impressed With Conditions

Capt. K. S. Irgens, of Oslo, Norway, who made a tour of Western Canada along the lines of the Canadian National Railways as the representative of the Norwegian Government, for the purpose of determining the advantages of this country for Norwegian farmers, has returned to Oslo to pursue his investigations. The captain expressed himself enthusiastically regarding the prospects of the country under the conditions found wherever he went, and took away with him favorable impressions of the West generally. He is likely to desert his post for a farm somewhere in one of the Western provinces. He met many of his countrymen during his tour, and everywhere found them doing well and very contented with the land of their adoption.

SAVE THE CHILDREN

In Summer When Childhood Ailments Are Most Dangerous

Mothers who keep a box of Baby's Own Tablets in the house may find that the lives of their little ones are reasonably safe during the hot weather. Stomach troubles, colic, indigestion and diarrhoea carry off thousands of little ones every summer. The most common cause of the trouble is because the mother does not feed her baby properly. Baby's Own Tablets relieve these troubles, or if given to the mother to the well child will prevent their coming on. The Tablets are made by a government analyst to be absolutely harmless even to the newborn babe. They are especially good in summer because they regulate the bowels and keep the stomach cool and pure. They are sold by medicine dealers or by mail. Write for a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A Reindeer Ranch

Raising reindeer for commercial purposes in Canada will be undertaken this year by the Dominion Reindeer Co., with headquarters at Vancouver; the company having imported some 5,000 head of reindeer from Alaska. This herd will be located on the vast trailing areas between the Athabasca and Great Slave lakes on three million acres secured for that purpose.

Minors' Liniment for burns.

For Restless Babies

Warm water is a trial to both mother and babe and the task of keeping the little one in perfect health is often very difficult. Properly the matter of proper food for the infant is of greatest concern to the average nurse.

In the winter from time to time you will find an advertisement of Borden's Eagle Brand Milk, a food which has raised more healthy babies than all the prepared infant foods combined. Out on the advertisement and mail it to The Borden Company, Limited, Montreal, and they will send you, free of charge, instructions for feeding your baby, and a Baby's Own Tablets, and this Borden Food. Or, just write the company mentioning this paper and they will send.

Minors' Liniment for cuts and bruises.

Things Worth Knowing About

Firestone Gum-Dipped Tires

Firestone pioneered, developed, tested and placed on the market the Balloon Gum-Dipped Tire—the genuine F.V.L. SIZED Balloon Tire.

But half the usual air pressure, these tires are very soft and yielding. They absorb the holes, ruts and bumps in the road. They cushion the car and its passengers from shocks and vibrations.

Firestone Gum-Dipping—by which each fiber and strand of cord in the tire is completely encased in a layer of pure gum—adds the extraordinary strength and flexibility which makes the Balloon construction practical.

Firestone Dealers are kept up-to-date on the latest developments and are constantly progressing and improving their ability to serve you better and save your money. See the nearest Firestone Dealer and let him handle your requirements.

Little Helps For This Week

Teach me to do Thy will, for Thou art my God.—Psalm 143:10.

Small service is true service to life.

Be not, however humble, spurs not one.

The day, by the shadow that it

Protects the lingering dew-drop

—William Wordsworth.

We can all be servants of God wherever our lot is cast. He gives us different sorts of work, according as He fits us for it and calls us to it.

Service is our destiny in life or in death. Then let it be my choice.

I strive to serve the living, and be freed from the dead.

—George Meredith.

Produced in Every Province

Alfalfa can be grown over the widest range of climatic conditions of any known legume in Canada. It is now being produced in every province from the Atlantic to the Pacific coast.

It Testifies for Itself.—Dr. Thomas' Electric Oil was used as a test of its power for relief of rheumatism.

It is for coughs or colds, for cuts or contusions, for sprains or burns, for pains in the limbs or body, well known that the medicine proves itself and needs no guarantees. This shows why this Oil is in general use.

Millions From Cowdrey Estate

Eight million dollars will go to the Eschwege as death duty on the \$28,000,000 estate of Viscount Cowdrey, who died in London, May first.

Uncle to Niece—"Are you enjoying the winter sports, my dear?"

Niece—"Rather. I'm engaged to three of them already."

DYSENTERY WAS SO BAD BECAME ALARMED

Mr. Wallace Pepper, R.R. No. 6, St. Louis, Ont., writes: "Last summer I was very bad with dysentery. I lost my appetite, and had such severe pains in my abdomen that I was unable to get up. I tried several remedies, but they did not help. I was in a very bad way when I was cured by Dr. Williams' Pink Pills. I am now in good health and feel much better than I did when I was so bad."

Dr. Williams' Pink Pills for Pale People.

I took only one of a bottle and was completely relieved. I feel I cannot say enough for this medicine. I am now 80 years old, yet I feel as young as I did when I was 20 years old. I feel as if I would like to take it every day."

This wonderful home remedy is sold by all druggists. Write for it to The Dr. Williams' Medicine Co., Limited, Toronto, Ont.

Cutting is now becoming
general in the district south-
west of town.

Mr. and Mrs. D. McEachern
are entertaining the former's
sister and niece, Miss Mary Mc-
Eachern, of Calgary, and Miss
L. Whitworth, of Vancouver.

Mrs. E. S. Sexton, left on a
trip to Medicine Hat, Saturday
of last week, returning Wed-
nesday.

Mrs. C. R. Moore, and daughter
Jean, returned from Winni-
peg, on Saturday last.

October 5. F. Barry and Miss Lena
Barry went to Medicine Hat
the first of this week. Mrs.
Barry returned on Wednesday.

Mr. and Mrs. Don McRae,
and baby daughter, motored to
Medicine Hat, Sunday.

John Sandereck left for
Winnipeg, Tuesday, on a brief
holiday visit.

The Misses Mildred, Peggy
and Helen Arthur, returned
the first of this week from their
vacation.

F. A. Millar, of Airdrie, Alta.,
arrived in town Wednesday and
has charge of the Alberta
Pacific elevator here.

Mr. and Mrs. Walkey Leech,
who motored to Regina to at-
tend the Fair, returned home a
few days ago.

Mr. and Mrs. John Neal, of
Alaska, are visiting here for a
few days as the guests of Mr.
and Mrs. R. L. Arthur.

Miss Rachel Lammert arrived
in town on Friday, and is visit-
ing here as the guest of Miss
Vera Saunders.

Anton Smarzyk, and son and
daughter, arrived last week
from Minneapolis, and are visit-
ing at the farm of his brother,
Paul Smarzyk, north of town.

Cutting of early sown crops
in the country north of town,
commenced this week. A num-
ber of the later sown crops are
still green, but are filling and
coming in rapidly.

R. M. of Mantario

Minutes of meeting, Saturday,
August 13, 1927. At Orange
Hall, Culbert, at 2.30 p.m.
Present, Reeve Rivers and a
full council.

Minutes of previous meeting
read and confirmed on motion
of G. Walker.

Batty—That the alterations
in the assessment as revised be
and are hereby confirmed.

Batty—That the revised esti-
mates for Ambrose S.D. (\$1200)
and Wainfleet S.D. (\$1000) be
passed and that the advances
requested be made.

Rivers—That the Secretary
be instructed to place in the
hands of the Municipal Solicitor
(G. E. Tracey) for collection
the arrears of taxes on unpat-
ented lands of former ratepay-
ers who have left the Municipality
without making provision
for payment; remuneration
to be on the basis of 10 p.c. on
all collections made.

Walker—That road allow-
ance on East of 17-27-28 W. 3,
be leased to R. R. Harriott for
three years, at a rental of \$1
per annum.

Walker—That a bylaw be in-
troduced to permit the Council
of the R. M. Mantario to enter
into agreements with the Union
Hospital, Estonia, the Empress
hospital, Empress, and the Al-
sack hospital, Alasak, for the
care and treatment, at the ex-
pense of the Municipality of
such classes of people as may
be deemed advisable, in ac-
cordance with the recent amend-
ment to the Rural Municipali-
ties Act, and that the same be
submitted to the ratepayers to
be voted upon at the time of the
annual election for Reeve and
Councillors of the Municipality.

The By-law was then intro-
duced.

Batty—That the By-law be
read a first time. Carried un-
animously.

Douglas—That the By-law be
read a second time. Carried
unanimously.

Austrum—That leave be given
to read the By-law a third
time at this meeting, and that
same be signed sealed and num-
bered 11. Carried unanimously.

Walker—That the tax rate
for the year be 5 mills.—Ayes,
6; Nays, 1.

Austrum—That the regular
meetings for September and
October be cancelled, and that
the next meeting be at the call
of the Secretary and held at
Orange Hall, Culbert. All
members waived notice of
meeting.

Douglas—That debenture
payment due September 1st be
paid at due date.

Rivers—That 3rd quarterly
payment be made to schools as
required.

The Secretary was instructed
to issue warrants to the bailiff
to collect by distress in all cases
where arrears of taxes are due
on unpatented lands, and where
no satisfactory agreement for
payment of same has been
made by the debtor. In any
case in which he was doubtful
as to whether proceedings
should be taken he was to refer
the same to the councillor for
the division and set upon his
instructions.

Kinch—That the following
accounts examined and passed
by the Finance Committee, be
paid:
Roads, Div. 1, S. Kinch, main, 10.00;
ditto, W. Cassel, culvert, cap. and
main, 55.60; Roads, Div. 111, day sheet,

cap. 201.00, main, 160.00; Roads, Div. 1,
day sheet, 21.60; Roads, Div. IV, M.
Nash, cap. 174.00, main, 100.00; Cul-
verts, IV, Mantario Lumber Yards, cap.
34.00; Ditto, V, 20.30. Roads Div. IV,
I, Techobell, main, 14.90; R. Hyland,
main, 19.50. Culv. Div. IV, C. Loun-
berry, cap. 1.80; Ditto, Div. V, cap.

Here and There

Living births in Canada during
1926 totalled 232,205, the birth-rate
for the nine provinces being 24.8
per thousand of population. Births
at all ages numbered 107,318 in the
Dominion, a rate of 11.4 per thou-
sand. Excess of births over deaths
in the year was 124,887. A total of
66,570 marriages were reported
during the year.

The general cold weather for this
season of the year in British Colum-
bia and the amount of moisture
received has saved a great deal of
timber from destruction by fire. So
far this year there have been only
216 forest fires in the province, as
compared with 570 for the similar
period of last year. The present
condition of the woods are excel-
lent.

As a sign of agricultural progress
in the west and industrial pros-
perity here, the International Har-
vester Company, Limited, have just
sent two of the largest trailblades
of threshers ever shipped to the
west over C.P.R. lines from the east,
the first train consisting of 45 cars
with 111 threshers and the other of
40 cars containing 103 threshers.

The ratepayers of Victoria have
endorsed a by-law providing for
civil support of a proposal for the
establishment by British interests
of a motion picture producing in-
dustry here, by a vote of 2,137
to 661. The city was thereby author-
ized to guarantee bonds of the con-
tract to the extent of \$200,000 after
\$500,000 had been raised by British
picture distributors and exhibitors.

A thriving new industry in South-
ern Alberta, which is making pro-
gress and is full of promise, is that
of the raising of pole ponies. Three
years ago the industry was confined
to this industry and ranchers and
farmers are coming increasingly to
embrace it as a side line. About
five carloads or one hundred pole
ponies leave Southern Alberta an-
nually for the United States.

EMPRESS THEATRE

It is expected that this Theatre will
Re-opened for Picture Shows commencing
the second week in September, also
that show nights will be Friday and Sat-
urday of each week. Watch for further
announcement.

Not merely
How much you pay
but
How Much You Get

CHEVROLET

WITH New Lower Prices is now
combined the most Amazing
Quality in all Chevrolet history.

Chevrolet has widened the circle of auto-
mobile ownership . . . provided econom-
ical transportation to untold thousands
. . . placed within reach of the average
motor-car buyer a QUALITY and a
LUXURY beyond all expectations.

In judging Chevrolet look not merely at
what you pay, but also at what you get.
Consider the smooth, fleet performance,
the grace and beauty of the Fisher bodies,
the ease of starting, driving and stopping,
the refined yet rugged quality evident
throughout Chevrolet construction.

Weigh Chevrolet quality with Chevrolet
price and know why Chevrolet has
achieved the most spectacular popularity
of any car in the world.
